SYSTEMS INTEGRATION MANAGER • BUSINESS SYSTEMS ENGINEER • SYSTEMS ANALYST • WEBMASTER • DATABASE SPECIALIST • ART DIRECTOR/EDITOR • TECHNICAL ILLUSTRATOR •

Systems Integration Manager: I am the lead systems analyst and database administrator for the campus student management system. Developing and leading inter-departmental projects like the SACS SharePoint team web portal are my specialty. I have had the experience of managing of a department of 3 full time IT professionals and 2 contract programmers. I kept projects on time and under budget. I have proven proficiencies in client / server network applications like Jenzabar CX, Microsoft Office SharePoint Server and Dot Net Nuke. My experience with enterprise applications includes deployment, support, and troubleshooting. I have designed syllabi and taught staff and faculty technology workshops. As Systems Analyst for the campus wide administrative system, Jenzabar CX, I maintain the HP-UX server. Providing the additional network support for the campus local area network and wireless network helped my staff during rush projects. I set up and maintain Microsoft SQL, Oracle and MySQL servers and databases.

Business Systems Engineer: I was the lead member of the Business Support Group that maintained computer and printer equipment used throughout the 800,000 square foot shipping warehouse. As web master I trained content providers to develop department web portals. As part of a cost cutting project I developed easy to use online web-based inventory and shipping reports. I was the Administrator the Aristo small package system for the Rivergate Distribution Center. I administered and developed catalogs for users and wrote reports using Cognos Impromptu

Database Specialist: I was a member of a team that developed the part attribute system for generating automated parts lists that cut pump engineering search time by 50%. I help coordinate Sulzer Pumps' transition to Visibility's materials resource planning (MRP) software. Using an Oracle database I administered catalogs for users and wrote reports with Cognos Impromptu.

Education

- Criss College, Santa Ana, California, Mechanical design and computer aided drafting
- California State University at San Diego, San Diego, California

Employment History

Huston-Tillotson University, Austin, Texas ... Systems Integration Manager 1/2008 - Present
Education Online Server administrator 6/2009 - Present
Huston-Tillotson University, Austin, Texas Interim IT Director 12/2007 – 1/2008
Huston-Tillotson University, Austin, Texas Webmaster 7/2004 – 12/2007
Columbia Sportswear, Portland, Oregon Business Systems Engineer 9/1999 – 6/2002
